AREAS

GESTRUCK, The software offers a complete control of the weighing operations of vehicles, with an easy to understand interface, and which facilitates, above all, the collection of the desired information with the maximum accuracy and quickness possible.

With GesTruck2 the users can register and process, in a quick and efficient way, the traffic in their weighbridges.

- » [INVENTORY CONTROL](#)
- » [MANAGEMENT OF STORAGE AREAS](#)
- » [STATISTICAL ANALYSIS](#)

It supports different installation structures: from the most basic one (only one working station) to complex installations of autonomous systems of weighing management.

**GESTRUCK
SLIM**

Standard version, easy and mono use. For installations of up to two scales in a weighing zone.

**GESTRUCK
ONE**

Multi-sector version for installations of up to five industrial scales, access and presence control. Installation triels, access control and presence. Installation on a single computer.

**GESTRUCK
PRO**

Multisectoral version. It allows to integrate all the modules and to accede using a mobile devices. Network installation.

MODULES

SOFTWARE GESTRUCK2

REQUIREMENTS OF THE OPERATING SYSTEM

- » Desk items applications (Windows 7/8/10).
- » 32 bits (x86) or 64 bits processor(x64) at 2.4 GHz or more.
- » 4 GB RAM Memory or more.
- » 16 GB or more of available disk space.

CONTROL MODULES

Flow control and vehicle placement devices system

Visual inspection

Vehicle recognition system

WEIGHING IN MOTION

Axle weighing system

COMMUNICATIONS MODULES

VISUAL INSPECTION SYSTEM

Monitor your weighing zones in real time.

The vision cameras will allow you to obtain both colour images and video. Moreover, its positioning in zenithal perspective is going to help you to control the material that you are transporting as well as keeping a screenshot of the vehicle. These images can be stored and used afterwards to be inserted in the ticket released as proof

INTERNAL AND EXTERNAL COMMUNICATIONS SYSTEM

TRANSMISSION OF WEIGHING DATA

This module allows the automatic transmission of weighing registers via report format (txt, xls, pdf) to electronic mail, FTP servers or directories.

- » Automated sending to specific directory.
- » It allows the transmission of data to third-party systems in the specified format. (Check the available formats. Possibility to add others on special request)

When registering the companies and sending them an electronic mail, the system is going to send automatically the copy of the ticket to notify the weighing which has been done.

Exporting the registers of the weighing

SLIM	ONE	PRO

PERIPHERAL CONTROLLABLE

Gestruck enables you to adapt your necessities of access control with a wide range of options, until reaching a complete automation of the weighing station.

01

POSITIONING
SENSORS

Elements to detect the positioning of the vehicle when in the weighing zone

02

TRAFFIC LIGHTS

Light signals which give access or exit permission to the weighing zone

03

BARRIER

Automated or via operator's command

04

CAMERAS

Centre of control of display and screenshot. Option of license plate recognition for the automation

05

TERMINALS

Self-service terminals for users and operators

TERMINALS

ASSOCIATED

They allow the user to adapt its access control necessities with a wide range of options to achieve a complete automation of the weighing station.

OPTIONS

ACCESS CONTROL SYSTEM

GST1 | GST2

Access terminals with operator or without operator, if it is installed the G2 Automatic applicative. Both terminals enable the installation of OPTIONALS to integrate identification systems of vehicles via RFID reader and light indications or in the case of the GST, LCD display. The GST2 terminal may contain a system of communication via intercom.

+ UNNATTENDED TERMINAL APPLICATIVE

G2 AUTOMATIC

- » It enables that the Terminals GST1 and GST2 to work against the GESTRUCK2 in unattended way (without an operator)

GST3

TERMINAL
TOUCHSCREEN

Supervise your weighing zones in real time. Vision cameras will enable you to obtain both images in colour as well as video. Therefore its positioning in zenithal perspective is going to help you with the material that is being transported or keep a screenshot of the vehicle.

ASSOCIATED SOFTWARE*

G2 TERMINAL

Driver interaction

FUNCTIONS

- » Entrance and exit weighs with a connection to Gesnet2 or Gestruck2 software.
- » The driver is going to introduce or confirm data.

G2 TERMINAL NW

It is thought to allow the simplification and completion of the weighing process in net weight. It allows the allocation of packaging and containers to discount the obtained weight

* The GST3 requires one of the two softwares

Bornes series GST

UNATTENDED
ACCESS
CONTROL
SYSTEM
GST (UWT)

GST3

- » Terminal with touch screen and software.
- » There are 3 different software to choose.
- » More options of interaction via intercom, barcode readers and others.
- » Consult our service centre to know about more options.

GST2

- » Terminal with proximity card, printer, LCD display. Painted or stainless steel option.
- » More interaction options via intercom.

GST1

- » Terminal for autonomous station with RFID reader to detect proximity and led indicator.
- » Painted and stainless steel version.

GES2WEB

PRIVATE AREA

Summary per company.
The customer can register and see the weighing data

STATISTIC

of weighing visualization

**SOLUTION OF
MANAGEMENT
CLOUD**

It enables the management of all the entities which interfere in a weighing process (companies, vehicles, materials, etc.).

Associated with the GesTruck2 or the application GT2App it will allow the control of all its production plants.

**ACCESS
ADMINISTRATION**

- » Definition of materials
- » Empowerment of vehicles
- » Possibility to control different weighing centres
- » Visualization of the state of the different containers of the centre

**USER'S
ACCESS**

- » Visualization of the data of the company
 - » Statistical brief
 - » Possibility to download invoices

MOBILE APPLICATION

It allows the capture of the weighing and send it to the Ges2Web.

This structure, thanks to the mobile and web application, gives the possibility to become the new transportable generation of GesTruck2.

Complete management of data collection of the entrances and details of the vehicle.

Available in Play Store for tablets and Android mobiles.

GT2APP

OFFLINE / ONLINE

This application offers the possibility to use it offline after the first data upload. The

ALL THE DATA NEEDED AT
YOUR HAND

CONFIGURATION

WIFI OR BLUETOOTH

Connection to the weighing system and/or the printer through WiFi or bluetooth.

STABILITY PARAMETERS

Configurable to specify depending on the type of material to be weighed (it will depend on the scale which has been installed).

PEDESTRIAN OPERATOR OF THE SCALE

- » Quick search of users and vehicles
- » Creation of user in the same search
- » Weighing or sharing materials function
