Flow Feeders

Loss-In-Weight Flow Feeder Continuous Dosing System

Loss-in-weight feeders are ideal dosing systems for a variety of applications from bulk, dry materials to liquids and even poorly flowing materials. Whether it's used in food or chemical production, high temperature or ATEX environments, Rice Lake Weighing Systems has a loss-in-weight feeder to meet your requirements

Depending on the material's behavior, agitation might have to be added. This could be a flexible wall, an agitation screw, pneumatically moving plates, or air pads. Our expertise and customer support ensure the correct system is chosen to fit your application.

**The best solution
for advanced industrial
applications**

Main features

- Flexwall hopper with paddle agitation
- Equipped with two motors for the independent motion of the agitation
- Screws are easily replaceable for running different capacities or products
- Flexible hopper easily replaceable for cleaning or product change
- Self-supporting, fully welded frame, so an extension hopper can be mounted
- Construction of mild steel or 304 stainless steel

Applications

- Dosing systems for powders and granulates
